

About pxc.biz™

What it is

pxc.biz™ is a web service to the business development and licensing (BD&L) professionals of pharmaceutical companies. It is an online business to business marketplace, where users publish offers and requests of pharmaceutical products.

How it works

The core of pxc.biz™ is a set of three marketplaces:

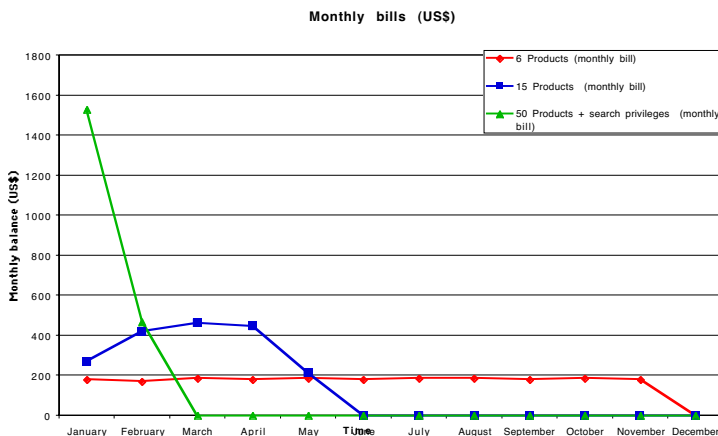

- Bulk pharmaceuticals (batches of products)
- Generic pharmaceuticals (registration dossiers)
- Proprietary products (licensing, e.g. new chemical entities).

For each marketplace there is a database of product **offers** and one of product **requests**.

After registration, users of pxc.biz™ can enter information in any of these marketplaces. The information is instantly made available to all visitors of pxc.biz™ after it has been entered. So, once you publish an offer or request for products in one of the pxc™ marketplaces you can reach a qualified world wide audience of professionals that are looking for business opportunities. Visitors can then view the information you published about items you want to buy or sell and make a contact to you, if they would like to do business with you.

Also, every time a new item is entered in the listings, pxc.biz™ automatically checks for potential matches between offers and requests, so that any possible business opportunity is between pxc™ users is explored right away.

How much it costs

Publishing product offers on pxc.biz costs as little as **1 US\$ per product** per day. The **maximum fee** charged to each user **per calendar year** is **2000 US\$**.

So, even if you decide to publish many items, you will never pay more than the maximum fee.

Publishing product requests is always free. All pxc.biz™ services, like mail forwarding, matching of offers and requests are free of charge.

*pxc.biz™ is **not** a brokerage service, so it does not charge any finder or transaction fees for successful contacts!*
